5. Calculation & Validation Rules

- Net invoice amount = Gross amount + Tax amount – Approved discount.
- Receivable aging is calculated from the reporting date and contractual due date.
- Exception severity is elevated when exposure exceeds ■10,00,000 or when an item remains unresolved for more than 45 days.
- Reconciliation difference must equal Book Balance – Bank Statement Balance; acceptable tolerance is ±■500.
- All percentages must retain their decimal precision during extraction; examples include 18.70%, 7.125%, and 0.45%.
